—Information on Cutaneous Lymphomas—

Cutaneous (Skin) Lymphomas are a type of cancer of white blood cells that you can develop in the skin, either as part of a whole body process or a localized one. Primary skin lymphomas develop and often stay in the skin, instead of the lymph nodes, spleen, or bone marrow. They are divided in two categories—cutaneous T-cell lymphomas (CTCL) and cutaneous B-cell lymphomas (CBCL).

CTCL (Cutaneous T cell lymphoma) is a general term for many lymphomas of the skin including mycosis fungoides, Sézary syndrome, cutaneous anaplastic large cell lymphoma, adult T-cell leukemia/lymphoma, and peripheral T-cell lymphoma.

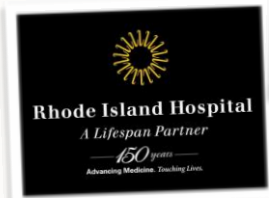

Mycosis fungoides (MF) is the most common type of CTCL. It is a low-grade lymphoma that primarily affects the skin. It usually has a slow course and remains confined to the skin. Skin-directed therapies include ultraviolet light treatment, topical steroids, and topical chemotherapies (nitrogen mustard). Systemic treatments are sometimes used for more advanced cases.

Brown Cutaneous Lymphoma Clinic

593 Eddy St., APC 10th floor
Providence, RI 02903
(401) 444-7959
Fax (401) 444-7144

Welcome to the Brown Multidisciplinary Cutaneous Lymphoma Program. Our multidisciplinary team provides comprehensive care to patients with a wide range of cutaneous lymphomas--including B cell lymphoma, mycosis fungoides, and Sezary syndrome.

FAQs

When does the clinic meet? The clinic meets on the last Monday of every month

What do I need to bring to my appointment? Please bring your insurance card and a photo ID.

What should I expect for my first appointment? You will be seen and examined by multiple physicians on our team. Given the Multidisciplinary approach, your appointment may last up to an hour or two. Based on the discussion, we may perform more biopsies, order bloodwork, or imaging studies.

How do I make an appointment? You or your doctor can call our main number at 401-444-7959 to schedule an appointment. Please specify that you would like to book an appointment for the Cutaneous Lymphoma Clinic.

Our staff is composed of a multidisciplinary team including doctors from the Departments of Dermatology, Hematology-Oncology, Radiation Oncology, and Dermatopathology.
